Project: Evaluation Criteria

Implementation (70 %)

- Implementation achieves the basic goals as stated in the project description.
- Documentation/comments are sufficient to understand the code.
- Implementation runs in other environments (e.g. in a different topology).
- Students came up with own ideas to solve the project.
- Students were working independently on the project.

Report (15 %)

- Report describes the main building blocks of the program.
- Report does not exceed maximum length of maximum 10 pages (less is better).
- Report briefly describes what each team member was contributing to the project.
- Report is well-written and contains useful illustrations.

Presentation (15 %)

- Presentation allows to understand the main building blocks and the working principles for somebody who was not involved in the project.
- Presentation contains a live demo (e.g., of one interesting feature) of maximum 5 minutes.
- All team members are involved in the presentation and can answer questions.
- Presentation does not exceed the maximum length of 12 minutes.
